## **Murphy Allen joins SunFarm Energy as Lead Technician**

SunFarm Energy (SFE), a premier provider of Solar Power Systems for the greater Pensacola area, including Escambia, Santa Rosa, Okaloosa, Bay and Walton Counties in Florida, and Baldwin and Mobile Counties in Alabama, is pleased to announce that Murphy Allen has joined the SunFarm Energy team as the Lead Technician.

As SFE enters 6 years in business, it is anticipating significant growth in the Solar Power and Green Energy industries based on continued technological improvement in performance and reliability, and ever improving cost efficiencies.

Murphy will be instrumental in the installation of residential and commercial solar power systems, electronic vehicle charging stations, solar thermal hot water & pool heating systems and energy saving LED lighting upgrades. Green technology upgrades yield energy savings for SFE's Clients, and in certain cases, allow customers to receive a 30% Federal Tax Credit.

"Murphy joins us after many years of service as Senior Technician for a nationally known specialty lighting, audio, video, and automation company. His unique talents and experience allow SunFarm Energy to provide the excellent green energy solutions that our Customers demand", noted Doug Herrick, "Murphy is well known and respected throughout the greater Pensacola area, and we're pleased to have him on our Team!"
