Electric Vehicle Charging Stations now available at Pensacola International Airport

In an effort to support the City's initiative to become more sustainable and green, Mayor Hayward is excited to announce that electric vehicle (EV) charging stations are now available at the Pensacola International Airport.

A total of six EV charging stations have been installed at Pensacola International Airport to expand on the amenities available to individuals traveling to and from the Gulf Coast region. EV charging stations have been installed on Levels 2 and 3 of the parking garage and in Economy Lot 2. Each reserved charging station provides a 22 foot charging cable and a 120 volt low power charge; suitable for use by long term parkers.

"Pensacola International Airport continues to be the first choice of travelers all along the central Gulf Coast, and this is another added feature that shows we are moving in the right direction," said Pensacola Mayor Ashton Hayward. "By growing our services to accommodate new technologies and patrons, we continue to position ourselves to compete for new carriers, new routes, and new passengers."

Individuals will not be required to pay an additional fee above the normal parking rate for the ability to charge their vehicle while parked at the Airport.
